OBJECTIVE

Looking for an cybersecurity or IT internship or co-op within Rochester or NYC for Summer 2027.

EDUCATION

B.S. in Computing and Information Technology - Rochester Institute of Technology

May 2030

WORK EXPERIENCE

RIT ITS Student Technician

August 2026 - Present

- Assisted in maintaining 3000+ Windows machines by diagnosing and resolving hardware and software issues
- Reimaged and deployed multiple Windows desktops and laptops for RIT faculty departments
- Provided in-person technical support to students and RIT faculty

PROJECTS

Personal Home Lab

October 2022 - Present

- Operated multiple Linux servers hosting various Dockerized and bare metal applications for private and public use
- Improved resiliency of DNS and uptime monitoring of my services via a secondary Linux server
- Configured a public proxy for accessing specific internal homelab services via a mesh VPN connection
- Wrote various Bash scripts for automating starting Docker containers, cleanup of Docker images, containers, and log files, and backing up playlists from a self-hosted music streamer

Personal Website - entering.theworkpc.com/wiki

August 2025 - Present

- Operated a documentation site using Astro Starlight for documenting my homelab and personal projects
- Wrote an article for using a VPS to proxy specific apps with a mesh VPN connection

EXTRA CURRICULARS

Society of Software Engineers - Lab Division Manager

November 2025 - Present

- Assisted in performing a transition from Debian 12 to Proxmox with minimal impact to users
- Deployed internal services for SSE student staff to use, such as Authentik for SSO, and Headscale for remote network access
- Addressed outdated and inflexible software on the server by automating system updates, website redeployment, and Discord webhook notifications
- Managed a small team on fixing and configuring computers for use in the SSE lab room

RITSEC - Cybersecurity Club

September 2025 - Present

Incident Response Competition (IRSEC) - *Blue Team*

November 2025

- Maintained uptime on a Rocky Linux server running Dockerized Apache by removing unknown users and malicious programs, closing unknown network connections, and replacing leaked credentials
- Team placed 6th out of 18 teams

Mini Competition (Collegiate Cyber Defense Competition) - *Blue Team*

November 2025

- Maintained uptime on a Windows server running IIS by removing unknown users and malicious programs, closing unknown network connections, and replacing leaked credentials

SKILLS

Languages

Java, Python, Bash, Markdown

Operating Systems

Linux (Fedora, Ubuntu, Debian, Proxmox)
